Papers Table of Contents

A01 Synthesis of [^{11}C]SKF 82957: A High-Affinity Dopamine D_1 Receptor Agonist
J.N. DaSilva, A.A. Wilson, S. Dobbin, S. Houle, *Clarke Institute of Psychiatry, University of Toronto* 1

A02 Carbon-11 Labelling of the D_2 Agonist (±)-4-[1-^{11}C-propyl]-9-hydroxynapthoxazine (±)[^{11}C]PHNO
D. Brown, S.K. Luthra, F. Brady, S. Osman, S.L. Waters, D. Dijkstra, H. Wikström, D. Baghurst, D.M.P. Mingos, *Hammersmith Hospital* 3

A03 Biodistribution Study of the Dopamine D-2 Receptor PET Radiotracer, ^{18}F-Fallypride
J. Mukherjee, Z.-Y. Yang, T. Brown, X. Ouyang, M. Cooper, *University of Chicago* 6

A04 Development of Fluorinated Dopamine Receptor Agonists as Potential Radiotracers for Functional Assessment of the Receptors
J. Mukherjee, Z.-Y. Yang, *University of Chicago* 8

A05 Radiosynthesis and In Vivo Evaluation of [^{11}C]A-69024 Enantiomers for Studying Dopamine D1 Receptors Using PET
M. Kassiou, U. Scheffel, H.T. Ravert, W.B. Mathews, J.L. Musachio, R.F. Dannals, *ANSTO* 10

A06 Synthesis and Enantiomeric Evaluation of an Iodine-123 Labelled Analogue of A-69024 for In Vitro and In Vivo Studies of Dopamine D1 Receptors
M. Kassiou, K. Mardon, C. Loc'h, A. Katsifis, B. Dikic, F. Mattner, *ANSTO* 12

A07 Synthesis and Biological Evaluation of 3-(3'-[^{18}F]Fluoropropyl)-2-5'-Iodothienylspiperone (FPITS): A New Potent and Selective D2 Dopamine Receptor Antagonist for PET or SPECT
B. Shi, M.M. Goodman, L. Tune, J. Hoffman, T.M. Shoup, C. Kilts, D. Eshima, L. Shattuck, J. Votaw, V. Camp, *Emory University* 15

A08 Synthesis of [^{123}I]-3-N-Methyl-2-iodothienylspiroperidol: A Novel Dopamine D_2 Receptor Imaging Agent for SPECT
R.N. Waterhouse, T. Gotsick, G.W. Kabalka, M.M. Goodman, J.C. O'Brien, *ANSTO* . 18

A09 Validation Studies of [^{18}F]Fluoroclebopride ([^{18}F]FCP): A Benzamide Analogue that Binds Reversibly to Dopamine D_2 Receptors
R.H. Mach, R.L.E. Ehrenkaufer, M.A. Nader, S.W. Line, C.R. Smith, C. Hubbard, M.-P. Kung, H.F. Kung, R.R. Luedtke, T.E. Morton, *Bowman Gray School of Medicine of Wake Forest University* 21

A10 Structure-Affinity Relationship for Dopamine D_2 Receptor
B. Liu, Z.-X. Meng, T. Zhu, J.L. Gong, *Beijing Normal University* 24

A11 Absorbed Radiation Dosimetry of the PET Radioligand N-Methyl-[F-18]Benperidol
S.M. Moerlein, J.S. Perlmutter, P.D. Cutler, J. Giovanni, M.M. Anderson, M.J. Welch, *Mallinckrodt Inst. of Radiology, Washington Univ. School of Medicine* 26

A12 A Selective Dopamine D_3 Receptor Agonist for PET. Evaluation and Preparation of (R)-(+)-[Propyl-^{11}C]PD 128907
C. Halldin, H. Hall, C. Lundkvist, D. Dijkstra, H. Wikström, C.-G. Swahn, L. Farde, L.D. Wise, T.A. Pugsley, G. Sedvall, *Karolinska Institute* 28

A13 Synthesis and Binding Studies of 2-Aminotetralins and 3-Aminobenzopyrans as Selective Ligands for Dopamine D2 Receptors at High Affinity States
S. Chumpradit, J. Vessotskie, M.-P. Kung, H.F. Kung, *University of Pennsylvania* 31

A14 Synthesis and Binding Studies of N-([2'-Pyrrodidinyl]Methyl)-2,3-Dimethoxy-5-Iodobenzamides as PET and SPECT Imaging Agents for Dopamine D2 and D3 Receptors
S.K. Meegalla, Z.-P. Zhuang, S. Chumpradit, H.-E. Wang, M.-P. Kung, J. Vessotskie, D.A. Stevenson, H.F. Kung, *University of Pennsylvania* 34

A15 Synthesis of R(+)-7-hydroxy-N-[^{11}C]methyl-N-propyl-2-aminotetralin, (7-OH[^{11}C]MPAT), a Potential High Affinity Agonist for the Dopamine D_3 Receptor
D. Brown, S.K. Luthra, F. Brady, S. Osman, S.L. Waters, D. Dijkstra, H. Wikström, *Hammersmith Hospital* 37

A16 Synthesis, Biodistribution and Regional Brain Distribution of n.c.a. Carbon-11 Labeled SDZ GLC 756, a Compound with High Affinity for D-4-like Receptors
M. Holschbach, W. Hamkens, W. Wutz, M. Schüller, R. Markstein, P. Seeman, H.H.M. Van Tol, G. Stöcklin, *Forschungszentrum Jülich* 39

A17 Synthesis of ^{11}C-Labelled (-)-OSU6162
H. Neu, K.-J. Fasth, C. Sonesson, B. Langstrom, *Uppsala University* 41

A18 Synthesis of 2β-Carbomethoxy-8-(ω[^{18}F]Fluoroalkyl)-3β-(3'-Nitrophenyl)-Carbamoylecgonine: Potential (-)-Cocaine Receptor Imaging Agents for PET
T. Gotsick, M.M. Goodman, G.W. Kabalka, R. Keil, B. Shi, *Emory University* 43

A19 Synthesis of 2β-Carbomethoxy-3β-([4-^{18}F]-Fluorophenyl)Tropane ([^{18}F]CFT) or [^{18}F]WIN 35 428
J. Bergman, M. Haaparanta, O. Solin, *Abo Akademi University* 46

A20 Synthesis and Autoradiographic Evaluation of the Dopamine Transporter Radioligands β-CIT, β-CIT-FE and β-CIT-FP Labelled with ^{125}I or ^{3}H
I. Günther, H. Hall, C. Halldin, C.-G. Swahn, L. Farde, *Karolinska Institute* 49

A21 Synthesis of ^{11}C- or ^{18}F-Labelled Analogues of β-CIT. Labelling in Different Positions and PET Evaluation in Cynomolgus Monkeys
C. Lundkvist, C. Halldin, C.-G. Swahn, L. Müller, N. Ginovart, Y. Nakashima, P. Karlsson, J.L. Neumeyer, S. Wang, R.A. Milius, L. Farde, *Karolinska Institute* 52

A22 N-[^{18}F]Fluoroalkyl-CFT: Synthesis and Cerebral Distribution
G. Firnau, J.J. Chen, D. Murthy, *Chedoke-McMaster Hospitals* 55

A23 Synthesis, Pharmacologic Characterization, Biological Evaluation and Primate Imaging of Fluorine-18 Labeled 2β-(R,S) Carbo-(2'-fluoroisopropoxy)-3β-(4-Chlorophenyl)-tropane (FIPCT):A Selective PET Radioligand for Mapping Dopamine Reuptake Sites
M.M. Goodman, B. Shi, R. Keil, J. Hoffman, C. Kilts, V. Camp, D. Eshima, L. Shattuck, M. Colla, *Emory University* 58

A24 Improved Synthesis, Pharmacologic Characterization, Tissue Distribution and Primate Imaging of Fluorine-18 Labeled 2-β-Carbomethoxy-3β-(4-Chlorophenyl)-8-(-3-Fluoropropyl)nortopane (FPCT):A PET Radioligand for Mapping Dopamine Reuptake Sites
R. Keil, T.M. Shoup, D. Eshima, L. Shattuck, C. Kilts, J. Hoffman, V. Camp, M. Colla, M.M. Goodman, *Emory University* 61

A25 Preparation and PET Evaluation of Radiobrominated Cocaine Analogues for Quantitation of Monoamine Uptake Sites
C. Loc'h, C. Halldin, P. Hantraye, C.-G. Swahn, C. Lundqvist, J. Patt, M. Maziere, L. Farde, B. Maziere, *Service Hospitalier Frederic Joliot* 64

A26 The Use of ^{18}F- and ^{11}C-Labelled Substituted Benzaldehydes in the Synthesis of Labelled Norepinephrine Analogues
O. Langer, C. Halldin, K. Nagren, M. Mitterhauser, C.-G. Swahn, I. Zolle, *Karolinska Institute* 66

A27 The Pharmacokinetic Behavior of Two N-[C-11]Methyl-Labeled Beta-Substituted and UnSubstituted Phentermine Tracers in the Rhesus Monkey Brain as Metabolism Resistant Analogs of Amphetamine
D.R. Elmaleh, A.-L. Brownell, J.W. Babich, R.N. Hanson, A.J. Fischman, *Massachusetts General Hospital* 69

A28 Radiosynthesis of NCA [^{18}F]N-(2-Aminoethyl)-5-Fluoro-2-Pyridine-Carboxamide: A Potential Tracer for Imaging MAO-B Using PET
S.M. Ametamey, M. Haeberli, H.-F. Beer, P.A. Schubiger, *Paul Scherrer Institute* 71

B01 A New Method for Production of ^{11}C-labelled Methyl Iodide from ^{11}C-Methane
P. Larsen, J. Ulin, K. Dahlstrom, *The National University Hospital* 73

B02 Production of [^{11}C] Methyl Iodide by Reaction of $^{11}CH_4$ with I_2
J.M. Link, J.C. Clark, P. Larsen, K.A. Krohn, *University of Washington* 76

B03 N.C.A. Gas Phase Production of [^{11}C]Methanol from [^{11}C]Methane. Application to the On Line Synthesis of [^{11}C]CH_3I
C. Crouzel, D. Fournier, *Service Hospitalier Frederic Joliot* 79

B04 Synthesis of [^{11}C]Ureas by [^{11}C]Carbonylation of Amines
P.H. Elsinga, T.J. Visser, G.M. Visser, W. Vaalburg, *Groningen University Hospital* ...81

B05 [^{11}C]Methyl Iodide and [^{11}C]Carbon Monoxide in Palladium-Promoted Coupling Reactions
Y. Andersson, B. Langstrom, *Uppsala University PET Centre* 84

B06 One Pot Synthesis of [^{11}C]Amides and [^{11}C]Amines from [^{11}C]Carboxylic Acid Salts
C. Aubert, C. Huard, M.C. Lasne, *Institute of Materials Sciences & Radiation* 87

B07 The Synthesis of [^{11}C]Methyl Magnesium Iodide and its Application to the Introduction of [^{11}C]-N-Tert-Butyl Groups and [^{11}C]-Sec-Alcohols
P.H. Elsinga, E. Keller, T.J. de Groot, G.M. Visser, W. Vaalburg, *Groningen University Hospital* 89

B08 Optimisation of the Preparation of No-carrier-added [^{11}C]Ethylene
F. Shah, V.W. Pike, *Hammersmith Hospital* 92

B09 Synthesis of [^{11}C]Chloroethyltriflate from [^{11}C]Ethylene; A Reagent for Introducing the Haloethyl Group into Antibody Directed Enzyme Prodrugs (ADEPT Prodrugs)
C. Prenant, F. Shah, F. Brady, S.K. Luthra, V.W. Pike, P.J. Burke, P.M. Price, *Hammersmith Hospital* 95

B10 High Yield n.c.a. On-line Synthesis of the Powerful Methylation Reagent [$^{11}CH_3$] Nonafluorbutanesulfonic Acid Methylester ([$^{11}CH_3$] Methyl Nonaflate) Using a Solid State Support
M. Holschbach, W. Hamkens, *Forschungszentrum Jülich* 98

B11 Synthesis of [^{11}C]Methyl Ketones via [^{11}C]Methylation of Dithiane Intermediates
P.H. Elsinga, E. Fluks, E.J.F. Franssen, G.M. Visser, W. Vaalburg, *Groningen University Hospital* 100

B12 Methylation of Amide, Thiol and Phenol Functions with [^{11}C]Methyl Triflate, Examplified by [^{11}C]NMSP, [^{11}C]Flumazenil, [^{11}C]Methionine and [^{11}C]Raclopride
K. Nagren, C. Halldin, C. Lundkvist, *University of Turku* 103

B13 S-,N- and O-[^{11}C]Methylations of a Nor Precursor Adsorbed on Al_2O_3/KF
F. Schmitz, A. Plenevaux, G. Del Fiore, C. Lemaire, J. Aerts, A. Luxen, *Liege University* 106

B14 Synthesis of [^{11}C]Methanethiol, A Precursor for S-[^{11}]Methylations
M. Suehiro, C.-Y. Shiue, C. Gonzalez, B. Dembowski, *University of Pennsylvania* 109

B15 [1-^{11}C]Bromoethane: An Alternative to the Use of [1-^{11}C]Iodoethane
F. Schmitz, G. Del Fiore, A. Plenevaux, C. Lemaire, J. Aerts, A. Luxen, *Liege University* 111

B16 Radiolabelling Using Hetereogeneous Media in Microwave Fields
S. Stone-Elander, J.-O. Thorell, P. Johnstrom, *Karolinska Institute* 113

B17 Evaluation of a Microwave Cavity for the Synthesis of PET Radiopharmaceuticals
C.S. Dence, E. Mishani, T.J. McCarthy, M.J. Welch, *Mallinckrodt Inst. of Radiology, Washington Univ. School of Medicine* 115

B18 Simple General Synthesis of NCA [^{13}N]Nitrosothiols and [^{13}N]Nitrosamines
M.T. Vavrek, G.K. Mulholland, *Indiana University School of Medicine* 118

B19 Reactions of [^{18}F]Fluoride with Aryliodonium Salts - A Novel Route to No-carrier-added Aryl [^{18}F]Fluorides
V.W. Pike, F.I. Aigbirhio, *Hammersmith Hospital* 120

B20 The Development of Ruthenium Iodoalkane Systems for Possible Use in ^{18}F Alkylation Reactions
J. Powell, M. Horvath, G.M. Visser, S. Zijlstra, W. Vaalburg, *University of Toronto* .. 123

B21 Synthesis of [2-^{18}F]-2,2,2-trifluoroethyl Triflate Using the Masked Ester 2-(bromodifluoromethyl)-4,4-dimethyl-2-oxazoline
P. Johnstrom, S. Stone-Elander, *Karolinska Institute* 126

B22 Reactivity of Radiolabeling Agent p-[^{18}F] Fluorophenacyl Bromide
J.B. Downer, T.J. McCarthy, W.B. Edwards, C.J. Anderson, M.J. Welch, *Dept. Chemistry & Mallinckrodt Inst. of Radiology, Washington Univ. Sch. of Med* 127

B23 Synthesis of [^{18}F]Fluoromethylbenzylsulfonate Ester: A Rapid and Efficient Method for the N-[^{18}F]Fluoromethylbenzylation of Amides and Amines
Y.S. Choe, D.H. Song, K.-J. Lee, S.E. Kim, B.T. Kim, Y. Choi, D.Y. Chi, *Samsung Medical Center* 130

B24 Regiospecific Ring Opening of Aziridines with [^{18}F]Fluoride: The Synthesis of β-[^{18}F]Fluorophenylalanine
N.M. Gillings, T.K. Venkachatalam, A.D. Gee, *Arhus Kommunehospital* 133

B25 The Use of [^{18}F]F_2 in Anhydrous Hydrogenfluoride. Preparation of 5-[^{18}F]Fluorocytosine and its Conversion to 5-[^{18}F]Fluorouracil
F. Oberdorfer, U. Haberkorn, K. Weber, G. Firnau, *Deutsches Krebsforschungszentrum* 135

B26 Iodine Monofluoride: A New Reagent for N.C.A. Radioiodination of Arenes in Comparison to I_2, IBr and ICI
H.H. Coenen, O. Thinius, K. Dutschka, *Universitätsklinikum Essen* 137

B27 A Direct Iodination Method with Iodine and Silver Trifluoromethanesulfonate for Synthesis of SPECT and PET Imaging Agent Precursors
G.K. Mulholland, Q.-H. Zheng, *Indiana University School of Medicine* 139

B28 Solidphase Labeling Method of 6-Radioiodinated L-DOPA Using Polymer-bound 6-Mercuric Carboxylate DOPA Precursors
K. Kawai, H. Ohta, M.A. Channing, A. Kubodera, W.C. Eckelman, *Science University of Tokyo* 141

B29 Polymer Supported m-Benzylguanidinium: A Route to No-Carrier-Added MIBG (m-Iodobenzylguanidinium)
D.H. Hunter, A.-M. Marinescu, C. Loc'h, B. Maziere, *University of Western Ontario* . 144

C01 Synthesis of Brominated and Fluorinated ortho-Tyrosine Analogs as Potential DOPA Decarboxylase Tracers
O.T. DeJesus, D. Murali, R.J. Nickles, *University of Wisconsin Medical School* 147

C02 Synthesis of α-(N-^{11}C-Methyl)-Aminoisobutyric Acid
B. Schmall, P.S. Conti, D.O. Kiesewetter, M.M. Alauddin, *National Institutes of Health* 150

C03 Synthesis and Evaluation of [18F]-1-Amino-3-Fluorocyclo-Butane-1-Carboxylic Acid (FACBC) for Tumor Localization
T.M. Shoup, M.M. Goodman, D. Eshima, L. Shattuck, M. Camp, *Emory University* . 153

C04 Synthesis of [^{11}C]Me-AIB, α-[^{11}C]methylamino-isobutyric Acid, for PET Examination of the Amino Acid Uptake System A
K. Nagren, P. Lehikoinen, S. Leskinen, *University of Turku* 156

C05 [123-I]Iodomethyltyrosine ([123-I]IMT: A Simplified Preparation and Metabolite Analysis
G. Westera, R. Böni, J. Meyer, R. Huch Böni, H. Steinert, *University Hospital, Zürich* 158

C06 Evaluation of 6-[^{123}I]iodo-L-DOPA as a Cerebral L-DOPA Transport Marker
K. Kawai, H. Ohta, A. Kubodera, M.A. Channing, W.C. Eckelman, *Science University of Tokyo* 161

C07 Ester Derivatives in Transport of ^{123}I-labelled D-glucose Analogues
M.D. Brunet, C. Morin, M. Vidal, *University of Grenoble* 164

C08 Oral vs Intravenous FDG: High Similarity Between Whole Body PET Distributions in Normal Dogs
G.K. Mulholland, K.A. Carlson, R. Fain, B.H. Mock, W.L. Winkle, M.T. Vavrek, *Indiana University School of Medicine* 167

C09 The Potential Uses of Animal PET in the Assessment of Drug Effect: Evaluation of the Effects of Nicotine and Ginsenoside Rb1
S.R. Choi, H. Saji, Y. Magata, Y. Yonekura, J. Konishi, A. Yokoyama, *Kyoto University* 170

C10 Mild Synthesis of [N-Methyl]-^{11}C]-Isovalcroyl-L-Carnitine
G. Angelini, F. Carnevaletti, G. Corsi, A. Margonelli, P. Ragni, F. Fazio, S. Todde, O. Tinti, *Instituto di Chimica Nucleare, CNR* 172

C11 Synthesis of N.C.A. (2S,4R)-4-[^{18}F]Fluoroproline: A Potential Amino Acid for PET Measurements of Procollagen and Matrix Protein Synthesis
K. Hammacher, G. Stöcklin, *Forschungszentrum Jülich* 175

C12 Multi-millicurie Preparation of 6-[^{18}F]Fluoro-6-deoxy-L-ascorbic Acid via Nucleophilic Displacement with ^{18}F-Labelled Fluoride
P.J. Kothari, W.G. Bornmann, R.D. Finn, J.C. Vera, D.W. Golde, S.M. Larson, *Memorial Sloan Kettering Cancer Center* 177

C13 High Yield Radioiodination of Sugar Analogs by Exchange Labelling
H.C. Lee, P. Kumar, A.J. McEwan, J.R. Mercer, *University of Alberta* 179

C14 Synthesis of 4-^{11}C-Labelled L-Aspartic Acid, L-Asparagine and L-2,4-Diaminobutryic Acid from Enzymatically Produced β-[^{11}C]Cyanoalanine
G. Antoni, H. Omura, M. Bergstrom, A. Sundin, Y. Watanabe, B. Langstrom, *Uppsala University PET Centre* 182

C15 Polymer-Bound Triphenylphosphine in Wittig Reactions Adapted to an Automated Synthesis of [6-^{11}C]-D-Glucose
M. Ogren, K.-J. Fasth, B. Langstrom, *University of Uppsala* 184

C16 ^{11}C-Labelling of Guanidines via the Corresponding Cynamides Using Supercritical Ammonia
G.B. Jacobson, G. Westerberg, K.E. Markides, B. Langstrom, *Uppsala University* 187

C17 Biodistribution, Metabolic Transformation and Tumor Localization of Adenosine and 2'-Deoxyadenosine Analogs in Rats
K. Fukushi, T. Irie, H. Namba, M. Iyo, *National Institute of Radiological Sciences* 190

C18 Development of PET Radiopharmaceuticals for Gene Therapy: Synthesis of 9-(1-[^{18}F]Fluoro-3-Hydroxy-2-Propoxy)MethylGuanine
M. Monclus, A. Luxen, J. Van Naemen, P. Damhaut, T. Velu, V. Cool, S. Goldman, *Hospital Erasme* 193

C19 Carbon-11 Labelling of a Series of DNA Intercalators Related to DACA
G.D. Brown, F. Brady, S.K. Luthra, S. Osman, S. Gamage, W.A. Denny, B.C. Baguley, S.L. Waters, P.M. Price, *Hammersmith Hospital* 196

C20 Yield Dependence of [^{18}F]FMISO on Different Reaction Parameters
M. Solbach, H.-J. Machulla, *Universität Tübingen* 199

C21 The Chemistry of the Novel Propylene Amine OXA Tc-Nitroimidazole Complex, BMS-194796
K.E. Linder, Y.-W. Chan, J.E. Cyr, A.D. Nunn, *Bracco Research USA* 202

C22 ^{99m}Tc-1-(N-Diphenylphosphinoacetylglycylglycyl-2-aminoethyl)-2-nitroimidazol: A New Agent for Non-invasive Imaging of Tissue Hypoxia
Z. Zhang, R.H. Mannan, A.J.B. McEwan, L.I. Wiebe, *University of Alberta* 205

C23 Copper(I) Assisted n.c.a. Radioiododebromination Using Cuprous Sulfate; Radioiodination of Reduction Sensitive 2-Nitromidazole Amino Acid Conjugates
H. Henneken, C. Krummeich, M. Holschbach, G. Stöcklin, *Forschungszentrum Jülich* . 208

C24 Assessment of Deuterium Substituted [^{11}C]L-Deprenyl ([^{11}C]L-Deprenyl-D2 as a Tracer for Glial Cell Proliferation and Age-related Changes in Human Brain Monoamine Oxidase B (MAO B)
J.S. Fowler, N.D. Volkow, G.-J. Wang, J. Logan, R. MacGregor, S. Xie, D.J. Schlyer, A.P. Wolf, N. Pappas, *Brookhaven National Laboratory* 211

C25 Radioactive N-Methyl-piperidyl-3-esters for In Vivo Measurement of Acetylcholinesterase(AchE) Activity in the Brain: Optical Resolution, Enzymatic Properties and In Vivo Response
T. Irie, K. Fukushi, N. Ikota, H. Namba, M. Iyo, S. Nagatsuka, *National Institute of Radiological Sciences* 214

C26 Fluorine-18 Labeled Dihydrorotenone Analogs: Preparation and Evaluation of PET Mitochondrial Probes
H.F. VanBrocklin, J.D. Enas, S.M. Hanrahan, J.P. O'Neil, *Lawrence Berkeley Laboratory* 217

C27 [^{125}I]Iodorotenone and [^{125}I]Iodorotenol: Synthesis and Evaluation of Mitochondrial Electron Transport Chain (ETC) Complex I Probes for SPECT
J.D. Enas, S.M. Hanrahan, H.F. VanBrocklin, *Lawrence Berkeley Laboratory* 220

C28 A Comparison of [^{11}C]-(-)-,(+)-and (-)-d_2-Phenylephrine as In Vivo Functional Heart PET Agents for MAO
R.B. Del Rosario, J. Caraher, D.M. Wieland, *University of Michigan Medical Center* . 223

C29 PET Radiotracers for Studies of Catechol-O-Methyltransferase
Y.-S. Ding, S.J. Gatley, J.S. Fowler, R. Chen, N.D. Volkow, J. Logan, C.E. Shea, Y. Sugano, J. Koomen, R.A. Ferrieri, *Brookhaven National Laboratory* 225

C30 PET Studies in the Baboon Brain and Biodistribution in the Rat of a New Monoamine Oxidase B Inhibitors
S. Bernard, C. Fuseau, L. Schmid, R. Milcent, C. Crouzel, *Service Hospitalier Frederic Joliot* 229

C31 Preparation and Evaluation of [^{76}Br]-Brofaromine for PET Studies of MAO-A Activity
E. Dubuquoy, C. Loc'h, D. Hunter, V. Strijckmans, C. Fuseau, C. Crouzel, P. Waldmeier, B. Maziere, *Service Hospitalier Frederic Joliot* 232

C32 Evaluation of N-[^{11}C]Methyl-4-Piperidyl Propionate as a Radiotracer for Acetylcholinesterase Activity in Vivo
S.E. Snyder, P. Sherman, D.E. Kuhl, M.R. Kilbourn, *University of Michigan Medical School* 234

C33 The Synthesis of Fluorine-18 Labeled Carbonic Anhydrase IV Inhibitors: Selectivity by Exclusion
T.J. Tewson, K. Sadilkova, C. Supuran, E. Swenson, *University of Washington* 237

C34 Synthesis of Carbon-11 Labeled Nitric Oxide Synthase (NOS) Inhibitors as Potential NOS Tracers for PET
J. Zhang, C.S. Dence, T.J. McCarthy, M.J. Welch, *Mallinckrodt Inst. of Radiology, Washington Univ. School of Medicine* 240

C35 Synthesis and In Vivo Characterisation of Some Potential Monoamine Oxidase-A Inhibitors: [^{11}C]Harmine, [^{11}C]Methylharmine, [^{11}C]Harmaline, [^{11}C]Clorgyline and [^{11}C]Brofaromine
G. Westerberg, M. Bergstrom, T. Kihlberg, B. Langstrom, *Uppsala University PET Centre* 243

C36 Radiosynthesis and Biodistribution in Mice of [1-^{11}C]phenylacetate
G. Bormans, T.J. de Groot, L. Mortelmans, A. Verbruggen, *Universitaire Ziekenhiuzen Leuven* 246

C37 Measurement of Chemical Change In Vivo by the Use of a Double Labelled Compound
J. Noguchi, K. Ogawa, T. Nozaki, H. Toyama, K. Oda, K. Ishiwata, S. Ishii, M. Senda, *Kitasato University* 248

C38 Synthesis of Carbon-11 Labeled Desipramine: A Potential Radiotracer for the Cardiac Norepinephrine Transporter
M.E. Van Dort, L. Tluczek, P.S. Sherman, D.B. Raffel, D.M. Wieland, *University of Michigan Medical Center* 251

C39 Synthesis of an Optically Active Calcium Channel Labelled Antagonist for In Vivo Cardiac PET Imaging
F. Dolle, F. Hinnen, R. Duval, J.-L. Peglion, C. Crouzel, *Service Hospitalier Frederic Joliot* 253

C40 New Preparation and Evaluation of 3-[^{76}Br]Bromobenzylguanidine ([^{76}Br]-MBBG) as a Tool for PET Imaging of Adrenergic Tumors
C. Loc'h, G. Nguyen, D. Hunter, K. Mardon, J. Clerc, P. Merlet, J. Lumbroso, A. Syrota, B. Maziere, *Service Hospitalier Frederic Joliot* 255

D01 Melatonin Binding Sites: ^{11}C- and ^{18}F-Labelled Melatonin Agonists
G. Firnau, J.J. Chen, B. Schulze, D. Murthy, L.P. Niles, R. Defrance, *Chedoke-McMaster Hospitals* 257

D02 Evaluation of Melanoma Seeking N-(dialkylamino)-alkyl-[^{123,131}I]iodobenzamides by Animal and Cell-culture Studies
H.H. Coenen, W. Brandau, H. Dittmann, K. Dutschka, T. Niehoff, P. Pulawski, F. Zölzer, J. Sciuk, C. Streffer, *Universitätsklinikum Essen* 260

D03 Synthesis and Evaluation of ^{18}F Labeled Benzamides: High Affinity Sigma Receptor Ligands for Imaging Tumors
C.S. Dence, C.S. John, R.E. Goree, W.D. Bowen, M.J. Welch, *Mallinckrodt Inst. of Radiology, Washington Univ. School of Medicine* 263

D04 Synthesis and In Vivo Evaluation of ^{123}I-1-(2-Hydroxyethyl)-4-[(4-iodophenoxy)-methyl]piperidine: A Novel Sigma Receptor Ligand that Exhibits High Uptake in B16 Melanoma in Mice
R.N. Waterhouse, T.L. Collier, J.C. O'Brien, *ANSTO* 266

D05 Synthesis, Comparative Evaluations of In Vitro Binding Affinities, and In Vivo Clearances of [I-125](N-Benzylpiperidin-4-yl)-Iodobenzamides
C.S. John, M.E. Gulden, B.J. Vilner, R. Venugopal, W.D. Bowen, *George Washington University Medical Center* 269

D06 Synthesis of F-18 Labeled Benzamides as a Sigma Receptor and MAO-B Inhibitor Ligands for PET Studies
C.-Y. Shiue, G.G. Shiue, S. Zhang, S. Wilder, J. Wolfram, J. Staub, *University of Pennsylvania* 272

D07 Synthesis and Labeling of [^{125}I/^{18}F]-N-(N-Benzylpiperdin-4-yl)-iodo/fluorobenzamides as σ-receptor Ligands
R.N. Hanson, D.R. Elmaleh, *Northeastern University* 275

D08 Dialkylaminoalkyl-4-Iodobenzamides: Influence of Specific Activity and Substituents on Melanoma Uptake and Biodistribution
C. Nicholl, A. Mohammed, M. Eisenhut, *University of Heidelberg* 277

D09 Selective 5-HT$_{1A}$ Receptor Ligands for PET; A Comparative Study of [^{11}C]WAY-100635 and [^{11}C]ORG-13502
G.M. Visser, A. van Waarde, J. Medema, W. Vaalburg, *Groningen University Hospital* 280

D10 Radioactive Metabolites of the 5-HT$_{1A}$ Receptor Radioligand, [O-methyl-^{11}C]WAY-100635, in Rat, Monkey and Humans Plus Evaluation of the Brain Uptake of the Metabolite [O-methyl-^{11}C]WAY-100634 in Monkey
S. Osman, C. Lundkvist, V.W. Pike, C. Halldin, J.A. McCarron, S.P. Hume, S.K. Luthra, C.J. Bench, P.M. Grasby, C.-G. Swahn, H. Wikström, T. Barf, N. Ginovart, L. Farde, I.A. Cliffe, A. Fletcher, *Hammersmith Hospital* 283

D11 [O-methyl-^{11}C]WAY-100635 - Routine Production, Quality Control and PET Studies of Binding to Central 5-HT$_{1A}$ Receptors in Humans
J.A. McCarron, V.W. Pike, K.G. Poole, S.P. Hume, A.A. Lammertsma, C.J. Bench, P.M. Grasby, I.A. Cliffe, A. Fletcher, *Hammersmith Hospital* 286

D12 The Labelling of Analogues of WAY-100635 with Carbon-11 or Fluorine-18 as Potential Radioligands for PET Studies of Central 5-HT$_{1A}$ Receptors
J.A. McCarron, C. Lundkvist, V.W. Pike, C. Halldin, C.-G. Swahn, H. Wikström, T. Barf, I.A. Cliffe, A. Fletcher, *Hammersmith Hospital* 289

D13 ^{11}C- and ^{18}F-labelled Analogues of WAY 100635: Less Potent Radioligands for 5-HT$_{1A}$ Receptor Studies
C.A. Mathis, K. Mahmood, N.R. Simpson, Y. Huang, J.M. Gerdes, J.C. Price, B.P. Blastos, *University of Pittsburgh* 292

D14 Fluoroalkyl Derivatives of the 5-HT1A Antagonist WAY 100635
A.A. Wilson, J.N. DaSilva, S. Houle, *The Clark Institute of Psychiatry, University of Toronto* 295

D15 Synthesis and Binding Studies of [^{3}H]MPPI and [^{3}H]MPPF: Radioactive Antagonist Ligands for 5-HT_{1A} Receptors
Z.-P. Zhuang, S.D. Hurt, D.A. Stevenson, M.-P. Kung, H.F. Kung, *University of Pennsylvania* 297

D16 Synthesis and Biodistribution of [F-18]-MDL100907. A Potent Ligand for PET Studies of $5HT_{2A}$ Receptors
D.-R. Hwang, Y.C. Hwang, C.A. Mathis, K. Mahmood, Y. Huang, J.M. Gerdes, *Kettering Medical Center* 299

D17 Synthesis of [^{11}C]RPR-72840A and its Preliminary Evaluation as a Probe for the Serotonin Reuptake System
D. Roeda, F. Dolle, C. Crouzel, *Service Hospitalier Frederic Joliot* 302

D18 Synthesis of [^{11}C]S21007 A Novel Selective and Partial Agonist of $5HT_3$ Receptors
S. Guillouet, L. Barre, F. Gourand, M.C. Lasne, L. Besret, F. Dauphin, S. Rault, *CEA-DSV/DRIPP CYCERON* 304

D19 Tc-99m[MPP] Complexes: Potential 5-HT_{1A} Receptor Imaging Agents
K. Plössl, Z.-P. Zhuang, S.K. Meegalla, J. Bradshaw, D. Frederick, D.A. Stevenson, M.-P. Kung, H.F. Kung, *University of Pennsylvania* 306

D20 The Synthesis of [O-Methyl-^{11}C]Venlafexine: A Potential Tracer of the 5-HT Reuptake Site
A.D. Gee, D. Smith, A. Gjedde, *Arhus Kommunehospital* 309

D21 Synthesis of Trans-1,2,3,5,6,10b-hexahydro-6-[4-(2'-[18F]fluoroethylthio)phenyl]-pyrrolo[2,1-a]isoquinoline: A New Radioligand for PET Study of the Serotonin Transporter
B. Shi, B. Faraj, M.M. Goodman, *Emory University* 311

D22 (R)-[N-^{11}C-Methyl]-11-hydroxy-10-methylaporphine as a Ligand for 5-HT_{1A} Receptors: Synthesis and Evaluation of its Biodistribution in Monkey with PET
J.-O. Thorell, M.H. Hedberg, A.M. Johansson, U. Hacksell, S. Stone-Elander, L. Eriksson, M. Ingvar, *Karolinska Institute* 314

D23 [^{11}C]MDL 100,907: A Potent and Selective Antagonist of 5-HT_{2A} Receptors Labelled with ^{11}C at Two Different Positions
C.A. Mathis, Y. Huang, N.R. Simpson, K. Mahmood, J.M. Gerdes, J.C. Price, *University of Pittsburgh* 316

D24 Technetium and Rhenium Complexes as Potential Receptor Binding Ligands
H. Spies, B. Johannsen, H.-J. Pietzsch, B. Noll, St. Noll, M. Scheunemann, T. Fietz, R. Berger, P. Brust, P. Leibnitz, *Forschungsinstitut Rossendorf* 319

E01 Targeting Small Cell Lung Cancer Using Iodinated Peptide Analogs
T.J. Hoffman, G.L. Sieckman, W.A. Volkert, *H.S. Truman Memorial V.A. Hospital* ..321

E02 Radiohalogenated DNA Aptamers
H. Dougan, J.B. Hobbs, D.M. Lyster, J.J. Weitz, *TRIUMF* 324

E03 Labelling of DNA Components and Ligands with ^{124}I
R. Weinreich, J.M. Koziorowski, L. Wyer, R.D. Finn, *Univ. Zürich & Paul Scherrer Instituts* 326

E04 ^{99m}Tc-MIBI and ^{201}Tl Uptake in Multidrug-resistant Tumor Cell Lines and Xenografts
E. Barbarics, J.M. Croop, J.F. Kronauge, D. Cohen, A. Davison, A.G. Jones, *Harvard Medical School* 328

E05 A Method for the Facile Preparation of MAG3 Conjugated DNA-Used as an Alternative ^{99m}Tc Labeling Method to Avoid Nonspecific Protein Binding
P. Winnard,Jr., D.J. Hnatowich, *University of Massachusetts Medical Center* 330

E06 Facile Introduction of the 4-(2-[^{18}F]Fluoroethylamino) Group into Thymidine Derivatives. A Versatile Approach Towards Labelling Antisense Oligodeoxynucleotides for PET
R.J. Davenport, G.M. Visser, S. Zijlstra, V.W. Pike, W. Vaalburg, *Groningen University Hospital* 332

E07 Oligonucleotides Labelled with ^{18}F-Linkers in the 5'-Position
E. Hedberg, H. Takechi, B. Langstrom, *Uppsala University* 335

E08 Synthesis of 5'-Deoxy-5'-[^{18}F]-Fluoro-Thymidine (5'-[^{18}F]FDT) A Bifunctional Agent to Investigate DNA Synthesis Rate and a Useful Tool as a Terminal Building Unit in Antisense ODN Labelling for PET
M.G. Vos, G.M. Visser, V.W. Pike, R.J. Davenport, W. Vaalburg, *Groningen University Hospital* 338

E09 Development of Labelled Antisense Deoxyoligonucleotides (ODNs) for Use in PET. Synthesis of the ^{11}C-Labelled Dinucleotide [^{11}C]-Thymidylyl(3'-5')Thymidine
G.M. Visser, M.G. Vos, R.J. Davenport, V.W. Pike, J. Medema, W. Vaalburg, *Groningen University Hospital* 341

E10 Delivery of High Energy Beta Radiation to mRNA by Antisense Mechanism and Tumor Cell Killing by Y-90 Labeled Bcl2 Antisense Oligodeoxynucleotide Probes
M.K. Dewanjee, L. Willem, M. Kapadvanjwala, S. Dewanjee, D.M. Lopez, A.N. Serafini, G.N. Sfakianakis, *University of Miami School of Medicine* 344

E11 Radiolabeled Single-stranded DNA Probe for Imaging Thrombin in Thrombus: Noninvasive Imaging of DNA-protein Interaction
M.K. Dewanjee, M.J. Abrams, L. Gonjalez, M. Kapadvanjwala, S. Dewanjee, A.N. Serafini, G.N. Sfakianakis, *University of Miami School of Medicine* 347

E12 Solid Phase Synthesis of a HYNIC-D-peptide-phosphorothioate oligodeoxynucleotide conjugate from two arms of a polyethyleneglycol-polystyrene (HLP) support
S. Basu, H.R. Kolan, M.L. Thakur, E. Wickstrom, *Thomas Jefferson University* 350

F01 Synthesis and In Vivo Evaluation of ^{11}C-Labeled Xanthine Derivatives as a PET Tracer for Mapping CNS Adenosine A1 Receptors
K. Ishiwata, R. Furuta, S. Ishii, N. Koike, J. Shimada, J. Noguchi, K. Endo, F. Suzuki, M. Senda, *Tokyo Metropolitan Institute of Gerontology* 353

F02 [^{11}C]-N-Methyl- and [^{18}F]-Fluoroethylepibatidine: Ligands for the Neuronal Nicotinic Receptor
J.T. Patt, G. Westera, A. Buck, S.R. Fletcher, P.A. Schubiger, *University Hospital, Zürich* 355

F03 ^{18}F-Labeling of the Muscarinic Receptor Ligand (R)-(-)-p-Fluoro-hexahydro-difenidole
R. Gail, K. Hamacher, R. Tacke, G. Stöcklin, *Forschungszentrum Jülich* 357

F04 Preparation and Pharmacological Evaluation of [^{76}Br]-Bromocaramiphen
V. Strijckmans, D. Hunter, C. Loc'h, F. Dolle, C. Coulon, B. Maziere, *Service Hospitalier Frederic Joliot* 360

F05 Novel, Diastereoselective Synthesis of Potent [C-11]-Labelled Antagonists for Quantification of Pulmonary Muscarinic Receptors with PET
T.J. Visser, A. van Waarde, G.M. Visser, Th.W. van der Mark, J. Kraan, K. Ensing, W. Vaalburg, *Groningen University Hospital* 362

F06 [^{76}Br]-Z(R,R)QNP: A High Affinity PET Radiotracer for Central Muscarinic Receptors
V. Strijckmans, D.W. McPherson, F.F. Knapp,Jr., C. Loc'h, C. Coulon, B. Maziere, *Service Hospitalier Frederic Joliot* 365

F07 Preparation, In Vitro and Initial In Vivo Evaluation of New Fluoroalkyl QNB Analogues as Potential mAChR Ligands for PET Studies
D.W. McPherson, H. Luo, A.L. Beets, B. Zeeberg, V. Sood, R.C. McRee, R.C. Reba, F.F. Knapp,Jr., *Oak Ridge National Laboratory* 367

F08 Characterization of (+)-[^{125}I]MIBT Binding in Monkey Brain Reveals Differences with Benzovesamicols
J.K. Staley, D.C. Mash, S.M. Parsons, A.B. Khare, S.M.N. Efange, *University of Minnesota* 370

F09 Simplified Synthesis Via Iododestannylation, Pharmacologic Characterization, Biological Evaluation of Iodine-123 labeled 2'-Iodo-& 4'-Iodo PK 11195 A Potent SPECT Radioligand for Peripheral Benzodiazepine Receptors
Y. Wang, M.M. Goodman, D. Chappel, R. Patterson, R. Eisner, K. Sullivan, S.M. Schmarkey, *Emory University* 373

F10 (+)-[^{125}I]MIBT Binding in Human Temporal Cortex Reveals Cholinergic Hypofunction in Alzheimer's Disease
S.M.N. Efange, E.M. Garland, J.K. Staley, A.B. Khare, D.C. Mash, *University of Minnesota* 376

F11 Synthesis and Imaging Nonhuman Primates with the Acetylcholine Agonist [C-11]Arecoline: Preliminary Evaluation
D.R. Elmaleh, J.W. Babich, A.-L. Brownell, M.A. Crowley, A.J. Fischman, *Massachusetts General Hospital* 378

F12 Synthesis and Preliminary Evaluation of C-11 Labeled RS 86, A Selective Muscarinic/Cholinergic Agonist as a Potential Tracer for Monitoring Alzheimer's Disease with PET
D.R. Elmaleh, A.-L. Brownell, E. Livni, J.W. Babich, M.A. Crowley, A.J. Fischman, *Massachusetts General Hospital* 380

F13 Synthesis and In Vivo Evaluation of (S)-(E)-5-(2-iodovinyl)nicotine: A New Neuronal Nicotinic Cholinergic Receptor Imaging Agent for SPECT
A. Watanabe, H. Saji, K. Seki, K. Ohkura, Y. Magata, Y. Iida, A. Yokoyama, *Kyoto University* 382

F14 Synthesis of Potential Radioligands for β-Adrenoreceptors by the ^{11}C-Methylation of (S)-CGP 12177
R.J. Davenport, V.W. Pike, K.A. Jaeggi, C. Halldin, K. Nagren, N. Ginovart, L. Farde, *Hammersmith Hospital* 384

F15 Radiosynthesis of [^{11}C]GB67 - A Potential Radioligand for the Study of α_1-Adrenoceptors with PET
R.J. Davenport, V.W. Pike, M.P. Law, D. Giardina, *Hammersmith Hospital* 387

F16 Synthesis of [N-^{11}C-Methyl]KF 17837 for Evaluation as a PET Ligand for Adenosine-A_{2A} Receptors
S. Stone-Elander, J.-O. Thorell, M. Ingvar, L. Eriksson, B. Fredholm, *Karolinska Institute* 389

F17 Synthesis of a ^{11}C-Labelled Derivative of the α-Adrenergic Receptor Ligand Clonidine
M. Bjorkman, Y. Andersson, Y. Watanabe, B. Langstrom, *Uppsala University* 391

F18 The Synthesis of [^{11}C]-labelled Amitriptyline
A.D. Gee, J. Sutcliffe, N. Gillings, M. Jacobson, *St. Thomas' Hospital* 393

F19 Synthesis of Iodine-123 Labelled Analogues of the Imidazobenzodiazepines Imidazenil and Ethyl-Imidazenil for In Vitro and In Vivo Studies of the Benzodiazepine Receptor
A. Katsifis, K. Mardon, M. Kassiou, F. Mattner, B. Dikic, *ANSTO* 396

F20 Synthesis and Preliminary Pharmacological Study of [^{11}C]Gabazine,A $GABA_A$ Antagonist
D. Le Bars, C.G. Wermuth, *CERMEP* 399

F21 [^{11}C]Naltriben: Synthesis and Biodistribution of a Selective δ_2-Opioid Receptor Antagonist for PET Imaging
M. Sajjad, C.D. Arnett, T.T. Conway, E. Akgun, P.S. Portoghese, *VA Medical Center, University of Minnesota* 401

F22 Synthesis of Carbon-11 Labeled Kappa Opiate Receptor Agonists
W.B. Mathews, X. Zhang, H.T. Ravert, J.L. Musachio, J.E. Flesher, J.J. Frost, R.F. Dannals, *The Johns Hopkins Medical Institutions* 404

F23 In Vivo Evaluations of [^{11}C]L-365,260 and [^{11}C]L-365,346, non-Peptide Antagonists for PET Studies of Cholecystokinin (CCK) Receptors
T. Haradahira, O. Inoue, K. Kobayashi, N. Takai, T. Nakano, K. Suzuki, *Research Development Corporation of Japan* 406

F24 Synthesis and Brain Distribution of a Nootropic Drug [^{11}C]Aniracetam
T. Haradahira, O. Inoue, K. Kobayashi, N. Takai, T. Nakano, *Research Development Corporation of Japan* 409

F25 Synthesis and Preliminary In-Vitro Binding Data for 7-Fluorokynurenic Acid: A Potential Glycine Antagonist for the NMDA Receptor Complex
M.J. Adam, K. Curry, T.J. Ruth, J. Gordon, *TRIUMF* 412

G01 Synthesis and Characterisation of [^{111}In]-Liposome Encapsulated [^{45}Ti]-Budotitane
R.N. Waterhouse, F. Mattner, L. Najdovski, T.L. Collier, J. Fallon, *ANSTO* 415

G02 ^{48}V Biodistribution Studies of Insulin Mimetic Vanadium Compounds
C. Orvig, D.M. Lyster, J.H. McNeill, T.J. Ruth, I.A. Setyawati, Y. Sun, C. Vo, V.G. Yuen, S.K. Zeisler, *University of British Columbia* 418

G03 Stable Indium(III) and Gallium(III) Complexes as Candidates for Conjugation to Antibodies
A.E. Martell, R.J. Motekaitis, Y. Sun, M.J. Welch, *Texas A&M University* 421

G04 Synthesis of an N_2S_2 Tetradentate Chelate System for the Preparation of Oxorhenium(V) and Oxotechnetium(V) Complexes Whose Structure Mimic That of Steroids
Y. Sugano, J.A. Katzenellenbogen, *University of Illinois* 424

G05 Pharmacokinetic Studies of ^{105}Rh(III) Complexes with Macrocycles Containing Thioether Groups
L. Ning, L.A. Ochrymowycz, C. Higginbotham, M. Struttmann, M.J. Abrams, J.F. Vollano, R.T. Skerlj, A.R. Ketring, W.A. Volkert, *H.S. Truman Memorial V.A. Hospital* 426

G06 Design and Synthesis of a Redox-Active Technetium-99m Nitrido Radiopharmaceutical
L. Uccelli, A. Duatti, C. Bolzati, F. Refosco, F. Tisato, C. Morin, R. Pasqualini, M. Giganti, A. Piffanelli, *Universita di Ferrara* 429

G07 Synthesis of the First Technetium-99m Nitrido Complex Containing a PN_2S Ligand
M. Santimaria, L. Uccelli, U. Mazzi, A. Duatti, *SORIN Biomedica* 432

G08 Co-ordination Properties of the Gly-L-Cys(SBzl)COOMe Peptide Modified by the $Ph_2P(CH_2)_2COOH$ Phosphine Group. Synthesis and X-Ray Structure of $ReOCl[Ph_2\underline{P}(CH_2)_2CO\underline{N}CH_2CO\underline{N}CH(CH_2\underline{S}Bzl)COOMe]$
U. Mazzi, G. Bandoli, M. Santimaria, M. Nicolini, *University of Padova* 435

G09 Factors Influencing the Labeling Efficiency of Chelators
S. Liu, D.S. Edwards, *The DuPont Merck Pharmaceutical Company* 437

G10 Stereochemical Issues in the Synthesis of Bis-Bidentate $(NS)_2$ Amino Thiol Complexes of Oxorhenium(V) and Oxotechnetium(V) Whose Structures Mimic Those of Steriods
R.K. Hom, D.Y. Chi, J.A. Katzenellenbogen, *University of Illinois* 441

G11 Radiolabelling of Amine Residues with Technetium Based on the Mixed Ligand Approach
M. Papadopoulos, I. Pirmettis, E. Paschali, A.D. Varvarigou, E. Chiotellis, *NCSR "Demokritos"* 444

G12 A New Mixed Ligand Complex With Rhenium and Technetium. Crystal Structure of [4-Toluenethiolato][N-(2-Mercapto-Ethyl)-N-(2-Pyrrolidin-1-Ylethyl)Amine]-Oxorhenium(V)
I. Pirmettis, M. Papadopoulos, Ch. Tsoukalas, C.P. Raptopoulou, A. Terzis, E. Chiotellis, *NCSR "Demokritos"* 447

G13 Technetium and Rhenium Chemistry of Bis-Benzylidene-1,1-Diaminobutane Ligands $MABH_2$, $CABH_2$ and ABH_2
S.J. Parrott, M. Rajopadhye, *The DuPont Merck Pharmaceutical Company* 450

G14 Cyclopentadienyltricarbonylrhenium and Technetium. An Organometallic Approach to Labelling Small Molecules with Radiometals. Studies on a π Ligand Transfer Process
T.W. Spradau, J.A. Katzenellenbogen, *University of Illinois* 453

G15 Radiolabeling Phosphinophenol (PO_2 and P_2O_4) Ligands with ^{99m}Tc and Preliminary Biodistribution Studies of the ^{99m}Tc-P_2O_4 Complex
H. Luo, D.M. Lyster, C. Vo, M. Hampong, C. Orvig, *University of British Columbia* . 456

G16 New Technetium-99m and Rhenium Complexes of Novel Water-Soluble Bis Phosphines
D.B. Berning, V. S. Reddy, K.V. Katti, P.R. Singh, T.J. Hoffman, W.A. Volkert, A.R. Ketring, *H.S. Truman Memorial V.A. Hospital* 459

G17 1,4-Ethano-1,4,8,11-Tetraazacyclotetradecane (Et-Cyclam): A New Ligand for Cu-64,67
T.M. Jones-Wilson, D.E. Reichert, C.J. Anderson, M.J. Welch, *Mallinckrodt Inst. of Radiology, Washington Univ. School of Medicine* 462

G18 Copper(I) bis(diphosphine) Complexes as a Basis for PET and Therapeutic Radiopharmaceuticals
J.S. Lewis, J. Zweit, P. Carnochan, P.J. Blower, *University of Kent* 465

G19 Mixed Bis(thiosemicarbazone) Ligands for Preparation of Copper Radiopharmaceuticals: Synthesis and Evaluation of Tetradentate Ligands Containing Two Dissimilar Thiosemicarbazone Functions
J.K. Lim, C.J. Mathias, M.A. Green, *Purdue University* 468

G20 Synthesis of a New Bifunctional Chelating Agent with Multimetal Binding Abilities
A. Safavy, B. Shafii, S. Pourmand, D.J. Buchsbaum, *University of Alabama at Birmingham* 471

G21 Monocationic Ga and In Complexes with Modified Amine Phenols Which Possess a 3-Dimensional $N_2N'_2O_2$ Donor Atom Cavity
E. Wong, S. Liu, S.J. Rettig, C. Orvig, *University of British Columbia* 474

G22 Characterisation of Lanthanum Complexes for PET Imaging
C. Foster, D. Parker, P. Carnochan, J. Zweit, *University of Durham* 477

G23 Selective Synthesis of Phosphonate Semi-Rigid Bifunctional Chelating Agents and the Influence of Cavity Size on Chelation of ^{153}Sm
J.F. Gestin, E. Benoist, C. Geay-Borel, A. Faivre-Chauvet, A.K. Mishra, R.C. Mease, S.C. Srivastava, J.F. Chatal, *National Institute for Health and Medical Research* 480

H01 Solid Phase Peptide Synthesis of Tyr-3-ocreotide and High Performance Liquid Chromatographic Purification
T.-W. Lee, S.-R. Chang, C.-S. Su, L.-H. Shen, Z.-T. Tsai, *Institute of Nuclear Energy Research* 483

H02 Enzymatic Labelling of Antibodies by Radiohalogenated Neuraminic Acid Analogs
U. Schwarz, G. Wunderlich, R. Brossmer, W.-G. Franke, *Universitätsklinikum* 485

H03 ^{99m}Tc Labelling Studies on $Ph_2P(CH_2)_2CONHGly\text{-}L\text{-}Cys(SBzl)COOMe$ and Preparation of the Labelled Species for the Conjugation of Peptides
M. Maggiolo, G. Manetto, D. Blok, R.I.J. Feitsma, E.K.J. Pauwels, M. Santimaria, U. Mazzi, *University of Padova* 488

H04 Tc-99m-HYNIC-RC-160 and Tc-99m-CPTA-RC-160: Synthesis of Chelating Agents, Preparation and Preliminary Evaluation
H.R. Kolan, M.L. Thakur, R. Wiaderkiewicz, J. Li, R. Duggaraju, *Thomas Jefferson University* 490

H05 Pre- and Post-Conjugate Labeling of Amines and Peptides with ^{188}Re Using the Mag_3 Chelate
A. Schaffland, S. Guhlke, F.F. Knapp,Jr., P.O. Zamora, H.J. Biersack, *University of Bonn* 493

H06 Preliminary Evaluation of Radioiodinated Alpha-melanocyte Stimulating Hormone (α-MSH) and its Analogue Using N-succinimidyl 3-iodobenzoate and Iodogen Methods
P.K. Garg, K.L. Alston, P.C. Welsh, M.R. Zalutsky, *Duke University Medical Center* . 496

H07 Synthesis, Radiolabelling, and Evaluation of DTPA/octreotide Conjugates for Radiotherapy
P.M. Smith-Jones, B. Stolz, R. Albert, G. Ruser, H. Mäcke, U. Briner, L. Tolcsvai, G. Weckbecker, C. Bruns, *Sandoz Pharma AG* 499

H08 Radiopharmaceutical Development of ^{123}I-Vasoactive Intestinal Peptide (VIP) for Receptor Scintigraphy in Oncology
P. Angleberger, I. Virgolini, O. Buchheit, M. Egger, R. Portner, H. Kvaternik, *Österr. Forschungszentrum Siebersdorf* 502

H09 Stability of $[^{111}In]$-DTPA-ocreotide In Vivo and In Vitro
A. Bruskin, H. Lundqvist, J.-E. Westlin, *Institute for Theoretical & Experimental Physics* 504

H10 A Search for the Optimal Positron Emitting Label for DTPA-octreotide
A. Bruskin, H. Lundqvist, J.-E. Westlin, H. Arnberg, V. Tolmachev, *Institute for Theoretical & Experimental Physics* 507

H11 Metabolism of Octreotide Conjugates of ^{64}Cu-TETA, ^{64}Cu-CPTA and ^{111}In-DTPA
M.V. Lanahan, L.A. Bass, M.J. Welch, C.J. Anderson, *Mallinckrodt Inst. of Radiology, Washington Univ. School of Medicine* 510

H12 ^{18}F-and ^{131}I-Labeling of the Octadecapeptide Apamin: A Selective Blocker of the Ca^{2+} Dependent K^+-Channel. Syntheses and In Vivo Evaluation in NMRI Mice
H.J. Wester, C. Krummeich, A. Fixmann, W. Förmer, H.W. Müller-Gärtner, G. Stöcklin, *Forschungszentrum Jülich* 513

H13 Labeling of Small Peptides with Yttrium and Gallium via a New DOTA-derivative or DFO Using Different Disuccinimidylic Esters as Linker
J. Brockmann, J. Rösch, *Forschungszentrum Jülich* 516

H14 In Vivo Uptake Kinetics and Dosimetric Calculations of ^{86}Y-DTPA-octreotide with PET as a Model for Potential Endotherapeutic Octreotides Labelled with ^{90}Y
J. Brockmann, F. Rösch, H. Herzog, B. Stolz, C. Bruns, G. Stöcklin, *Forschungszentrum Jülich* 519

H15 Evaluation of Some Direct Labeling Technologies of Tc-99m Monoclonal Antibody in Efficiency and Targeting
Y.J. Li, R.Z. Cao, W.H. Zhou, Y.L. Yu, *Shanghai Institute of Nuclear Research* 522

H16 Electrochemical Reduction of ^{188}Re for Protein Labelling
E. Dadachova, S.V. Smith, P.F. Schmidt, S. Mirzadeh, *ANSTO* 524

H17 Labelling of Proteins with ^{166}Ho
E. Dadachova, S.V. Smith, N. DiBartolo, P.F. Schmidt, S. Mirzadeh, E.L. Hetherington, *ANSTO* 526

H18 Biokinetics of Monoclonal Antibodies Labelled with Radio-Lanthanides and ^{225}Ac in Xenografted Nude Mice: Preliminary Results
G.J. Beyer, R.E. Offord, G. Künzi, R.M.L. Jones, U. Ravn, Yu. Aleksandrova, R.C. Werlen, H. Mäcke, M. Lindroos, S. Jahn, D. Tengblad, & the ISOLDE Collaboration , *HCU Geneva* 529

H19 The Direct Labelling of IgG Antibody with Tc-99m Using FSA as a Reducing Agent for Pretreating
X.B. Wang, A.A. Noujaim, T.R. Sykes, *Beijing Normal University* 531

H20 Re-188 Labelling of DD-3B6/22 Fab' Antibody for Radioimmunotherapy
P.F. Schmidt, S.V. Smith, P. Bundesen, *ANSTO* 533

H21 Labeling of Monoclonal Antibodies (MAbs) with N-Succinimidyl 3-hydroxy-4-[^{131}I]iodobenzoate (mSHIB)
G. Vaidyanathan, D.J. Affleck, S.A. Slade, M.R. Zalutsky, *Duke University Medical Center* 536

H22 Catabolism of Label from an $F(ab')_2$ Fragment Radioiodinated Using N-Succinimidyl 3-iodobenzoate and Iodogen Methods
P.K. Garg, K.L. Alston, M.R. Zalutsky, *Duke University Medical Center* 539

H23 Preparation and In Vivo Evaluation of Radiolabeled LDTPA Protein Conjugates
K.A. Deal, J.R. Duncan, M.J. Welch, *Mallinckrodt Inst. of Radiology, Washington Univ. of Medicine* 542

H24 Biodistribution and Metabolism of the MAb 1A3 and 1A3-F(ab')$_2$ when Labeled with $^{64/67}$Cu Through Four Different Bifunctional Chelates
B.E. Rogers, C.J. Anderson, J.M. Connett, L.W. Guo, K.R. Zinn, M.J. Welch, *Mallinckrodt Inst. of Radiology, Washington Univ. School of Medicine* 544

H25 Technetium-99m-Labeled Hydrazino Nicotinamide Derivatized Intact and F(ab')$_2$ 1A3, An Anticolorectal Monoclonal Antibody (MAb)
S.W. Schwarz, J.M. Connett, C.J. Anderson, M.J. Welch, G.W. Philpott, *Mallinckrodt Inst. of Radiology, Washington Univ. School of Medicine* 547

H26 Improved One Step Synthesis of N-Succinimidyl 4-[^{18}F](Fluoromethyl) Benzoate for Protein Labeling
L. Lang, W.C. Eckelman, *National Institutes of Health* 551

H27 Identification of Metabolites of F-18 Labeled Anti-TAC Disulfide Stabilized Monoclonal Antibody Variable-region Fragments in Mice
L. Lang, C.W. Choi, J.T. Lee, K.O. Webber, T.M. Yoo, H.K. Chang, N. Le, E. Jagoda, C.H. Paik, I. Pastan, J.A. Carrasquillo, W.C. Eckelman, *National Institutes of Health* 554

H28 Synthesis and Evaluation of para-Iodohippuric Acid Tetrafluorophenyl Ester for Radioiodination of Antibodies
D.K. Hamlin, D.S. Wilbur, J.E. Stray, A. Chitnis, K.R. Buhler, J. Daniel, R.L. Vessella, *University of Washington* 557

H29 Production of Zirconium-labelled Antibodies and their Biodistribution in Tumour-bearing Mice
W.E. Meijs, H.J. Haisma, R.P. Klok, F.B. van Gog, E. Kievit, H.M. Pinedo, J.D.M. Herscheid, *Free University* 560

H30 Synthesis of Radioiodinated Biotin Derivatives
C.F. Foulon, S.J. Adelstein, A.I. Kassis, *Harvard Medical School* 563

H31 In-111 Avidin and In-111 Streptavidin Localization in Tumor as a Function of Dose Administered
T.S.T. Wang, S. Das, R. Greenspan, R.L. Van Heertum, R.A. Fawwaz, *Columbia University* 566

H32 Binding of Radioyttrium to Human Serum Albumin: Relevance to Endotherapeutic Applications of ^{90}Y-labelled Pharmaceutics
B. Neumaier, F. Rösch, *Forschungszentrum Jülich* 569

I01 Palladium Mediated Synthesis of [^{18}F]Fluorophenyl Alkenes or Arenes
L. Allain-Barbier, M.C. Lasne, C. Huard, L. Barre, *Institute of Material Sciences & Radiation* 572

I02 A Study of α,α,α-Trifluorotoluenes Mediated [^{18}F]Fluoro-for-Nitro Exchange. A Useful Intermediate in the Synthesis of Highly Fluorinated Radiopharmaceuticals
E. Mishani, C.S. Dence, T.J. McCarthy, M.J. Welch, *Mallinckrodt Inst. of Radiology, Washington Univ. School of Medicine* 575

I03 Labelling of the CFC-alternative, 2H-Heptafluoropropane (HFC 227ea), with Fluorine-18
F.I. Aigbirhio, V.W. Pike, *Hammersmith Hospital* 578

I04 Halogen Activation of the Aromatic Ring. A New Approach for the Synthesis of 2- and 3-[^{18}F]Fluoroalkylarenes?
J. Ermert, R. Gail, H.H. Coenen, *Forschungszentrum Jülich* 581

I05 Radiosynthesis of 4-[^{18}F] Fluoronapthol Derivative
S. Guillouet, L. Barre, F. Gourand, I. Ekaeva, M.C. Lasne, *CEA-DSV/DRIPP CYCERON* 584

I06 Synthesis of α-[^{18}F]Fluoro-β-alanine via a Nucleophilic Route
A.N. Sergis, F. Brady, S.K. Luthra, C. Prenant, S.L. Waters, C.J. Steel, S. Osman, P.M. Price, *Hammersmith Hospital* 586

I07 The Routine Synthesis of Fluorine-18 16α-Fluoroestradiol: The Use of 3-Methoxymethyl-Epiestriol-16β,17β-Cyclic Sulfate as the Starting Substrate
T.J. Tewson, *University of Washington* 589

I08 Radiosynthesis of [^{18}F]Fluticasone Propionate for Lung Deposition Studies with PET
F.I. Aigbirhio, V.W. Pike, R.M. Carr, D.R. Sutherland, *Hammersmith Hospital* 592

I09 Palladium-Mediated Coupling Reactions of ^{18}F-Labelled Arylhalides with Organotin Compounds
T. Forngren, Y. Andersson, B. Lamm, B. Langstrom, *Uppsala University* 595

I10 Comparison of [^{18}F]Fluorosulfenylation to [^{18}F]Fluoroselenenylation
K. Hatano, T. Yanagisawa, *Iwate Medical University* 597

I11 4-[^{10}B]Borono-2-[^{18}F]Fluoro-L-Phenylalanine-Fructose Complex for use in Timing Boron Neutron Capture Therapy (BNCT)
N.K. Reddy, G.W. Kabalka, C.P.D. Longford, T.G. Roberts, *The University of Tennessee* 599

I12 3-[^{18}F]Fluorobenzidine: A Precursor to Fluorine-18 Labeled Congo Red, A Potential Imaging Agent for Alzheimer's Disease
Z.Y. Zhang, M.R. Akula, C.P.D. Longford, G.W. Kabalka, *The University of Tennessee* 601

I13 Evaluation of New Precursors for the Electrophilic Synthesis of 6-[^{18}F]Fluorodopa
T.K. Venkachatalam, N.M. Gillings, A. Gjedde, A.D. Gee, *Arhus Kommunehospital* 603

I14 A Strategy for the Labeling of [F-18]-3'-deoxy-3'-fluorothymidine: [F-18]FLT
J.R. Grierson, A.F. Shields, *University of Washington* 606

I15 Radiosynthesis of (C-11)methyl-labeled AZT from (C-11)methyl Iodide
J.R. Grierson, A.F. Shields, J.M. Link, *University of Washington* 608

I16 Alternatives in the Synthesis of 2-[^{11}C]-Thymidine
J.M. Link, J.R. Grierson, K.A. Krohn, *University of Washington* 610

I17 Aspects of the Synthesis of ^{11}C-labelled Aromatic Compounds
J. Steinbach, P. Mäding, K. Chebani, J. Zessin, F. Füchtner, B. Johannsen, *Forschungszentrum Rossendorf* 613

I18 [^{11}C] Copper Cyanide in Synthesis of Various [^{11}C] Benzonitriles and [^{11}C] Benzamides
M. Ponchant, S. Terrillon, E. Darrouzet, S. Demphel, C. Crouzel, *Service Hospitalier Frederic Joliot* 616

I19 A High Yield and Simplified Procedure for the Synthesis of α-[^{11}C]Methyl-L-Tryptophan
P.K. Chakraborty, T.J. Mangner, D.C. Chugani, O. Muzik, H.T. Chugani, *Children's Hospital of Michigan* 619

I20 A Convenient Synthesis of 1-Aminocyclobutane-1-[^{11}C]Carboxylic Acid (1-[^{11}C]ACBC)
G.W. Kabalka, J.F. Green, K.F. Hubner, C.P.D. Longford, T.G. Roberts, *The University of Tennessee* 622

I21 Radioiodination of Vitamin B_{12}, Synthesis and nca-Radioiodination of Cobalamin - Carboxamide Derivatives
D.S. Wilbur, D.K. Hamlin, P.M. Pathare, S. Heusser, E.V. Quadros, P. McLoughlin, A.C. Morgan, *University of Washington* 625

I22 Convenient High Yield Direct Electrophilic n.c.a. Radioiodination of Poorly Activated Anisole Derivatives Using the Iodo-gen™ Trifluoroacetic Acid System
C. Krummeich, M. Holschbach, G. Stöcklin, *Forschungszentrum Jülich* 628

I23 An Efficient Synthesis of No-carrier-added meta-[^{123}I]-Iodobenzyl-guanidine
J.L.H. Eersels, G.J. Ensing, J.D.M. Herscheid, *Free University* 631

I24 Kit Formulation for the Preparation of Radiolabeled 5-Iodo-2'-Deoxyuridine (IUdR) by Demetallation
C.F. Foulon, S.J. Adelstein, A.I. Kassis, *Harvard Medical School* 633

I25 No-Carrier-Added [^{131}I]MIBG (m-iodobenzylguanidine) from m-Trimethylstannyl benzylguanidine
R.J. Flanagan, A. Goel, F.P. Charleson, D.H. Hunter, *Frosst Radiopharmaceuticals, Merck Frosst Canada Inc.* 636

I26 Regiospecific Synthesis of 15-(4-[^{123}I]Iodophenyl) Pentadecanoic Acid (IPPA) via Methyl,15-(4-Trimethylstannylphenyl) pentadeconoate
M.J. Adam, P.A. Culbert, J. Lu, G. Leong, *TRIUMF* 639

J00 The Impact of F_2 on Organic Chemistry
S. Rozen, *School of Chemistry, Tel-Aviv University* 641

J01 Development of an Automated Synthesis Apparatus for [^{13}N]-labeled Compounds Using Anhydrous [^{13}N]Ammonia
K. Suzuki, N. Shikano, A. Kubodera, *National Institute of Radiological Sciences* 644

J02 Enantioselective Synthesis of NCA [^{18}F]Fluoro-L-Dopa: Adaptation to Routine Use
P. Landais, F. Bonnefoi, V. Kudlyk, C. Dentresangle, G. Galy, D. Le Bars, D. Comar, *CERMEP* 647

J03 Robotic Synthesis of N-[F18]Fluoroethyl Neuroreceptor Ligands for PET
J.L. Bockhorst, S.M. Moerlein, G.G. Gaehle, M.J. Welch, *Mallinckrodt Inst. of Radiology, Washington Univ. School of Medicine* 650

J04 Preparation of Fluorodeoxyglucose F 18 Injection ([^{18}F]FDG) via the GE Microlab Device: The Washington University Experience
S.M. Moerlein, J.L. Bockhorst, G.G. Gaehle, K.L. Lechner, B.A. Siegel, M.J. Welch, *Mallinckrodt Inst. of Radiology, Washington Univ. School of Medicine* 653

J05 Development of a Semi-Remote System for the Routine Preparation of [^{18}F]6-fluoro-L-meta-tyrosine to Study Striatal Lesions and Therapeutic Implants in Primates
J.P. O'Neil, H.F. VanBrocklin, *Lawrence Berkeley Laboratory* 655

J06 Automated Preparation of No-carrier-added ^{18}F-labelled Radiopharmaceuticals by of Means Heterogenuous Nucleophilic Substitution
M. Solbach, H.-J. Machulla, *Universität Tübingen* 658

J07 Siemens/CTI/IBA Automated System for Production of [C-11]Methyl Iodide: On Going Evaluation, Operating Parameters and Field Modifications
R.L.E. Ehrenkaufer, T. Morton, R.H. Mach, F. DeFilippi, *Bowman Gray School of Medicine of Wake Forest University* 660

J08 Technical Performance and Operating Procedure of a Bedside [^{15}O]Water Infuser
H.J. Tochon-Danguy, J.C. Clark, A. Janus, J.I. Sachinidis, *ARMC* 662

J09 Fully Automated and Reliable Chemistry Module for the Production of 2-[^{11}C]-Thymidine Starting From [^{11}C]-HCN, Including HPLC Purification
M.G. Vos, J. Medema, K.P. de Jong, M.J.H. Slooff, E.J.F. Franssen, G.M. Visser, W. Vaalburg, *Groningen University Hospital* 665

J10 Automated Radioisotope Extractor (AUREX)
R.A. Ferrieri, D.J. Schlyer, *Brookhaven National Laboratory* 668

J11 Automated Production of 6-[^{18}F]Fluoro-L-Dopa in a Commercially Available Chemistry Module
Z.Y. Zhang, G.W. Kabalka, C.P.D. Longford, H.C. Padgett, S.S. Zigler, *The University of Tennessee* 671

J12 Simple and Efficient Distillative [^{11}C]Acetate Synthesis
B.H. Mock, G.K. Mulholland, M.T. Vavrek, *Indiana University School of Medicine* ... 673

J13 Automated System for Efficient Trapping of ^{11}CO and $^{11}CO_2$ Using a Silica Column
T. Kihlberg, P. Bjurling, B. Langstrom, *Uppsala University* 675

J14 An Integrated Remote System for Collection and Clinical Delivery of Cyclotron Produced Inhallation Gases
R.L.E. Ehrenkaufer, H. Chilton, F. DeFilippi, *Bowman Gray School of Medicine of Wake Forest University* 677

J15 On-column Preparation of ^{11}C-Labeled Amino Acids
R. Iwata, T. Ido, M. Tada, *Tohoku University* 679

J16 A General Preparative HPLC System for the Rapid and Efficient Separation of ^{18}F-Labelled-2- and 6-Fluoro Isomers of FluoroDOPA, Fluoro-3-o-methyl-DOPA and Fluoro-m-Tyrosine
R. Chirakal, G. Firnau, C. Nahmias, G. Coates, *Chedoke-McMaster Hospitals* 681

J17 Isotopic and Chemical Purity of Radioiodides: Direct Determination by Ion Chromatography
D.H. Hunter, K. Mueller, G.Wong Won, *University of Western Ontario* 684

J18 The Stereochemistry of (R,R)-IQNB
D.O. Kiesewetter, J.L. Flippen-Anderson, W.C. Eckelman, *National Institutes of Health* 686

J19 Separation of Racemic α-Methyl-Tryptophan into its L-and D-Isomers and Synthesis of α-(^{11}C-Methyl)-L-Tryptophan
B. Schmall, S.E. Shoaf, R.E. Carson, P. Herscovitch, L. Sha, W.C. Eckelman, *National Institutes of Health* 689

J20 Synthesis and Chiral Separation of ^{11}C-β-Aminoisobutyric Acid (^{11}C-β-AIB): A Major Catabolite of [Methyl-^{11}C]Thymidine
M.M. Alauddin, P.S. Conti, J.D. Fissekis, *University of Southern California* 692

J21 Fast Quality Control of Short-Lived Radiopharmaceutical Compounds with a Photodiode Array Detector
A. Plenevaux, C. Lemaire, J. Aerts, G. Del Fiore, A. Luxen, *Liege University* 695

J22 Development and Validation of a High-performance Liquid Chromatographic Method for the Determination of Raclopride in Plasma
A. de Bartolomeis, M.G. Der, E. Jagoda, B. Schmall, R. Saunders, T.P. Su, A. Breier, R.E. Carson, W.C. Eckelman, *National Institutes of Health* 697

J23 Studies on Separation of 5-fluorouracil from Uracil by Reversed-phase HPLC
T. Hartung, T. Adler, *University of Ulm* 700

J24 Analysis of Radiolabelled Compounds Using Capillary Zone Electrophoresis
M.J. Poirier, J.L. Glajch, E.F. Barry, *The DuPont Merck Pharmaceutical Company* .. 702

J25 Improved Sensitivity and Selectivity in the Determination of Specific Radioactivity by Means of Radio-HPLC-MS
B. Hyllbrant, N. Tyrefors, K.E. Markides, B. Langstrom, *Uppsala University* 704

J26 ^{11}C and ^{123}I-Labelled 2-β-Carbomethoxy-3-β-(4-Iodophenyl)-Tropane (β-CIT) Derivatives and their Labelled Metabolites in Monkey and Human Plasma Determined by Gradient HPLC
C.-G. Swahn, C. Halldin, K. Bergström, C. Lundkvist, L. Farde, *Karolinska Institute* .706

J27 Determination of Labelled Metabolites of the Dopamine D-2 Receptor Antagonist [^{11}C]FLB 457 in Monkey and Human Plasma by Gradient HPLC
C. Halldin, C.-G. Swahn, L. Farde, *Karolinska Institute* 709

J28 [^{11}C]meta-Hydroxyephedrine - Determination of Labelled Metabolites in Rat Plasma and Heart, and in Serial Plasma Samples from Human Subjects During PET Studies
S. Osman, M.P. Law, V.W. Pike, D.R. Turton, R.J. Davenport, M. Schäfers, P.G. Camici, *Hammersmith Hospital* 712

J29 Determination of the Anticancer Agent [3-N-[^{11}C]methyl]temozolomide and its Metabolites in Human and Rat Plasma
S. Osman, S.K. Luthra, G.D. Brown, C. Prenant, F. Brady, S. Hume, S. Ashworth, C. Brock, P.M. Price, *Hammersmith Hospital* 715

J30 A Low-cost Photodiode Detector for Radio-HPLC Quality Control of Positron-emitting Radiopharmaceuticals
D. Luckau, T. Hartung, *University of Ulm* 718

J31 Sterilisation and Desinfection of Components for PET Radiopharmaceutical Synthesis - Some Aspects of Microbiologically Safe Production
R. Wagner, B. Bauer, H.-M. Wenchel, *MPI für Neurologische Forschung Köln* 721

J32 Sep Pak™as Alternative to Rotary Evaporators for Radiopharmaceutical Formulations
C. Lemaire, A. Plenevaux, G. Del Fiore, J. Aerts, A. Luxen, *Liege University* 723

J33 A Triple Isotope Technique to Study the Radiopharmacology of Technetium Agents
R.J. Nickles, T.L. Mulnix, B.T. Christian, C.K. Stone, K.J. Carlson, L.F. Whitesell, A.D. Nunn, *University of Wisconsin* 726

J34 The Determination of the ^{18}O Concentration of ^{18}O-Enriched Water by Derivatisation and Mass Spectrometry
D.R. Turton, G.P. Anderson, C.J. Steel, S.L. Waters, *Hammersmith Hospital* 729

J35 Simple Methods for Preparation of High Purity Cu-67 and Y-90
P. Bläuenstein, R. Schwarzbach, K. Zimmermann, P.A. Schubiger, *Paul Scherrer Institute* 732

J36 "Tiny Bubbles": An Ultrasonic Bubble Detector for Use in Remote Bolus Injection of [O-15]Water
R.L.E. Ehrenkaufer, H. Chilton, F. DeFilippi, *Bowman Gray School of Medicine of Wake Forest University* 734

J37 An Optical Cell and Light Source for Carrying Out Rapid High-Yield Radiotracer Syntheses Involving [^{18}F]-Fluoride
R.A. Ferrieri, D.J. Schlyer, *Brookhaven National Laboratory* 736

J38 Efficient Electrochemical Recovery of [^{18}F]Fluoride from Water
K. Hamacher, G. Blessing, *Forschungszentrum Jülich* 739

J39 [1-^{11}C]Bromoethane: An Alternative to the Use of [1-^{11}C]Iodoethane
F. Schmitz, G. Del Fiore, A. Plenevaux, C. Lemaire, J. Aerts, A. Luxen, *Liege University* 741

J40 Alkaline Hydrolysis of 2-[^{18}F]Fluoro-1,3,4,6-tetra-O-acetyl-D-glucose in the Preparation of 2-[^{18}F]Fluoro-2-deoxy-D-glucose
F. Füchtner, J. Steinbach, J. Mäding, B. Johannsen, *Forschungszentrum Rossendorf* ..743

J41 Fast Routine Production of L-[^{11}C-Methyl]Methionine with Al_2O_3/KF in a Disposable Unit
G. Del Fiore, F. Schmitz, A. Plenevaux, C. Lemaire, J. Aerts, A. Luxen, *Liege University* 746

J42 S-, N- and O-[^{11}C]Methylations of a Nor Precursor Adsorbed on Al_2O_3/KF
F. Schmitz, A. Plenevaux, G. Del Fiore, C. Lemaire, J. Aerts, A. Luxen, *Liege University* 749

J43 Microwave-induced Preparation of [^{11}C]Amino Acids via NCA-Bücherer-Strecker Synthesis
C. Giron, G. Luurtsema, M.G. Vos, P.H. Elsinga, G.M. Visser, W. Vaalburg, *Groningen University Hospital* 752

J44 Fast Routine Production of L-[^{11}C-Methyl]Methionine with Al_2O_3/KF in a Disposable Unit
G. Del Fiore, F. Schmitz, A. Plenevaux, C. Lemaire, J. Aerts, A. Luxen, *Liege University* 755

J45 A Practical Method for the Preparation of [^{11}C]Acetate
P.S. Kruijer, T. Ter Linden, R. Mooij, F.C. Visser, J.D.M. Herscheid, *Free University* 758

J46 Specific Activities of ^{13}N-Chemical Species Generated by the $^{16}O(p,\alpha)^{13}N$ Reaction Using an Ultra Pure Water Target Saturated with Gases
M. Sasaki, T. Haradahira, K. Suzuki, *Sumitomo Heavy Industries, Ltd.* 761

J47 The Production of Oxides of Nitrogen-13: Evaluation of a System for the On-Line Production of Either [N-13]Nitric Oxide or [N-13]Nitrogen Dioxide
T.J. McCarthy, C.S. Dence, M.J. Welch, *Mallinckrodt Inst. of Radiology, Washington Univ. School of Medicine* 764

K01 (Aminostyryl)pyridinium (ASP) Dyes As New Radioactive Cell Membrane Permeant Probes: Synthesis of Tributyltin Precursors, Radioiodination, Development of Mixed Leukocyte and Lymphocyte Labeling Procedures, and Preliminary Imaging Studies In Dogs With An Induced Inflammatory Abscess
C. Lambert, R.C. Mease, L. Avren, T. Le, H. Sabet, J.G. McAfee, *George Washington University Medical Center* 767

K02 Synthesis and Biodistribution of Indium(III) Complexes with Hexadentate Bis(salicylaldimine) Ligands
S.-P. Wey, Y.-M. Hsiao, C.J. Mathias, M.A. Green, *Purdue University* 770

K03 Structure-Activity Study of Bis(aminoethanethiol) Complexes of Ga(III) and In(III): Relationship Between Stability and In Vivo Behavior
C.J. Anderson, Y. Sun, T.S. Pajeau, R.J. Motekaitis, D. Reichert, R.D. Hancock, A.E. Martell, M.J. Welch, *Mallinckrodt Inst. of Radiology, Washington Univ. School of Medicine* 773

K04 Synthesis and Biodistribution of Two Cationic Copper-64 Complexes
A.B. Packard, P.J. Day, J.F. Kronauge, S.T. Treves, *Children's Hospital, Harvard Medical School* 776

K05 Novel $Tc^{V}O(III)$ N_2S_2 Complexes: Interconversion by Redox Reaction
S. Oya, M.-P. Kung, D. Frederick, H.F. Kung, *University of Pennsylvania* 779

K06 Small and Neutral $Tc^{V}O(III)$ N_2S_2 Complexes for Developing New Brain Imaging Agents
S. Oya, K. Plössl, M.-P. Kung, D.A. Stevenson, H.F. Kung, *University of Pennsylvania* 782

K07 Effects of Stability and Lipophilicity on the Brain Extraction and Retention of ^{99m}Tc-PAO Complexes
C. Cutler, Z. Jiang, B. Chen, L. Shao, Y.P. Ding, W.R. Heineman, T. Maina, F. Tisato, C. Seliskar, E. Deutsch, *University of Cincinnati* 785

K08 Quantitative Study of Brain Retention Mechanism of ^{99m}Tc(V)O-Chelates
B.-L. Liu, H.M. Jia, *Beijing Normal University* 788

K09 Complexes of Tc-99m with Dimethyl Ethyleneimine Phenol Formed at pH 8 Mediated with Boric Acid and Boronic Acid and In Vivo Evaluation
J.M. Lo, W.T. Huang, S.Y. Tsai, H.H. Yao, *National Tsing Hua University* 791

K10 Technetium Radiolabeling and Biodistribution of Dialkyldiethylcarbamylmethylphosphonates (DCMP) Ligands as a Possible New Class of Imaging Agents
T.P. Gammarano, D. Eshima, L. Shattuck, R.T. Payne, *University of New Mexico* ... 794

K11 A New Potential Renal Imaging Agent ^{99m}TcN-EC
G. Liu, B. Liu, *Beijing Normal University* 797

K12 Evaluation of ^{99m}Tc(V)-DMS in Ovarian Cancer Bearing Nude Mice
L. Tang, D. Bian, S. Li, *1st Affiliated Hospital of Chongqing* 799

K13 Production, Automatic Delivery and Bolus Injection of [^{15}O]Water for Positron Emission Tomography Studies
P. Damhaut, J. Van Naemen, M. Monclus, A. Luxen, S. Goldman, *Hospital Erasme* .. 802

K14 Suitable PET Isotopes of Radionuclides Used in Therapy and Diagnostics
H.-W. Thümmel, I. Kämpfer, *University of Leipzig* 805

K15 Structure and Utilization of Glycosaminoglycans (GLYCOS) as Carriers in Rapid Selective Delivery of Radionuclides to Tumors for Application in Tumor Imaging and Potential Therapy
P.V. Kulkarni, P.P. Antich, A. Constantinescu, R. Xiong, W. Erdman, D.F. Ranney, H. Chen, Z.M. Zadei, G.M. Eberhardt, R.W. Parkey,
University of Texas Southwestern Medical Center 808

K16 High-Yield Production of Iodine-124 Using the ^{125}Te(p,2n)^{124}I Reaction
G. Vaidyanathan, B.W. Wieland, R.H. Larsen, J. Zweit, M.R. Zalutsky, *Duke University Medical Center* 811

K17 Astatine-211 Radiotherapeutic Agents: Production of Clinically Relevant Quantities and Quality Using an Internal Target System
R.H. Larsen, B.W. Wieland, M.F. Dailey, G. Vaidyanathan, P.K. Garg, M.R. Zalutsky, *Duke University Medical Center* 813

K18 Is the Production of ^{186}Re with Cyclotron Irradiations an Alternative to Neutron Activation in a Reactor?
R. Schwarzbach, P. Bläuenstein, J. Jegge, P.A. Schubiger, *Paul Scherrer Institute* 816

K19 Radiolabeled Photosensitizers for Tumor Imaging
J.E. van Lier, F. Benard, S.V. Kudrevich, R. Ouellet, J. Rousseau, *University of Sherbrooke* 818

K20 HFIR-Produced Radioisotopes of Current Medical Interest
S. Mirzadeh, A.L. Beets, F.F. Knapp, Jr., *Oak Ridge National Laboratory* 820

K21 Iodine-120, A New Positron Emitting Radionuclide for PET Radiopharmaceuticals
J. Zweit, S.K. Luthra, F. Brady, P. Carnochan, R.J. Ott, T. Jones, *Royal Marsden Hospital* 823

K22 The Development of $^{191}Os/^{191m}Ir$ Generator
M.D. Kozlova, A.B. Malinin, S.B. Sevastyanova, C.V. Sedov, *Institute of Biophysics* 826

K23 Applied PET Chemistry Studies for U.S. FDA Approval of 2-[^{18}F]FDG
S.S. Zigler, *CTI Cyclotron Systems, Inc.* 829

K24 Development of a Routine System for the Cyclotron Production of Copper-64
D.W. McCarthy, R.F. Shefer, R.E. Klinkowstein, C.S. Cutler, C.J. Anderson, M.J. Welch, *Mallinckrodt Institute of Radiology, Washington University School of Medicine* 830
